Technical Skills

Programming Languages: Java (Proficient), Python (Intermediate)

Frameworks & Engines: Spring Boot, Spring Batch, Spring Framework
Business Process Management System (BPMS), Flask

Data & Messaging: PostgreSQL, MySQL, Redis, Apache Kafka, REST APIs, gRPC, GraphQL

DevOps & Tools: Docker, Git, CI/CD, Postman, IntelliJ IDEA, VS Code

Professional Experiences

OCBC

Software Engineer

Jakarta, Indonesia

October 2025–Present

- Work as an in-house engineer to build internal tools, as part of Group Engineering, closely collaborating with engineers from Singapore, Malaysia, and China
- **Loan Origination System**
- Develop a loan system using Java, the Spring Framework, and a microservices architecture
- Utilize BPMS to manage and monitor business processes
- Use pub-sub to synchronize data status across microservices
- Tech stack: Java, Spring Framework, Kafka, Camunda BPMS

GDP Labs

Software Development Engineer

Jakarta, Indonesia

August 2021–October 2025

- Developed customized software solutions across multiple projects with diverse technology stacks
- Mentored 1 intern, providing guidance on feature design and conducting code review sessions
- **Insurance Sales System**
- Maintained, enhanced, and designed features for an insurance sales platform
- Integrated third-party services for payment processing, email, and the core insurance system
- Optimized system performance through asynchronous processing using Redis message queues and Spring Batch
- Tech stack: Java, Spring Framework, SQL, Redis, Docker, CI/CD, Git
- **Customer Service Email System**
- Maintained customer service email management systems with SMTP and IMAP
- Implemented customer feedback mechanisms using survey systems via email
- Tech stack: Java, Spring Framework, SQL, Redis, Docker
- **iOS Application Development**
- Enhanced and maintained iOS applications using Swift and UIKit frameworks
- Implemented new features and resolved bugs to improve application functionality and user experience
- Profiled and optimized data synchronization processes to ensure consistency across devices
- Tech stack: Swift, UIKit, Core Data, Git, XCode
- **Research & Development**
- Conducted research and benchmarking of Spring gRPC APIs for potential future implementation

Indonesia Medical Education and Research Institute

Intern

Jakarta, Indonesia

July 2020–September 2020

- Conducted research on spinal surgery procedures and preoperative planning methods
- Developed a 3D simulation tool using Python, Pygame, and OpenGL to assist surgeons with preoperative planning and procedure visualization

Lintasarta

Intern

Jakarta, Indonesia

December 2019–February 2020

- Developed a web-based attendance management system for internal company use
- Integrated third-party facial recognition services with a responsive web interface using Flask and Vue.js

Education and Certifications

IELTS Academic

Band 7.5

– Credential ID: 24ID515931HAQB017A

IDP

February 2025

Universitas Indonesia

Bachelor of Computer Science

Jakarta, Indonesia

2017 –2021

Languages

Indonesian (Native), **English** (Proficient - IELTS 7.5), **Japanese** (Beginner - JLPT N4 Equivalent)
