Technical Skills

Languages: Java (Proficient), Python (Intermediate), Swift (Intermediate)

Technologies: Spring Framework, REST APIs, GraphQL, Docker, Git, Redis, PostgreSQL

Tools: IntelliJ IDEA, VS Code, GitHub, Postman

Professional Experiences

GDP Labs

Software Development Engineer

Jakarta, Indonesia

August 2021–Present

- Develop customized software solutions across multiple projects with diverse technology stacks
- Experienced in mentoring 1 intern
- **Insurance Marketplace Project**
- Maintain and enhance an insurance marketplace platform built with Java and Spring Framework
- Integrate multiple third-party services for payment processing, email functionality, and the insurance core system
- Design and implement key features including document generation, insurance payment workflows, and insurance product management
- Optimize system performance through asynchronous processing using Redis Message Queue and Spring Batch
- Tech stack: Java, Spring Framework, PostgreSQL, Redis, Docker, CI/CD, Git, AWS, Jira
- **Customer Service Email System**
- Develop and maintain a customer service email management system using Java and Spring Framework
- Integrate SMTP and IMAP services to streamline email communication workflows
- Implement customer feedback mechanisms by using survey systems
- Tech stack: Java, Spring Framework, PostgreSQL, Redis, Docker, CI/CD, Git, AWS, Jira
- **iOS Application Development**
- Enhance and maintain iOS applications using Swift and UIKit framework
- Implement new features and resolve bugs to improve application functionality and user experience
- Profile and optimize data synchronization processes to ensure consistency across all devices
- Tech stack: Swift, UIKit, Core Data, Git, Xcode, iOS SDK
- **Research & Development**
- Conduct research and benchmarking of Spring gRPC APIs for potential implementation in future projects

Indonesia Medical Education and Research Institute

Intern

Jakarta, Indonesia

July 2020–September 2020

- Conducted research on spinal surgery procedures and preoperative planning methodologies
- Developed a 3D simulation tool using Python, Pygame, and OpenGL to assist surgeons in preoperative planning and procedure visualization

Lintasarta

Intern

Jakarta, Indonesia

December 2019–February 2020

- Developed a web-based attendance management system for internal company use
- Integrated third-party facial recognition services with a responsive web interface using Flask and Vue.js

Education and Certifications

IELTS Academic

Band 7.5

IDP

February 2025

- Credential ID: 24ID515931HAQB017A

Universitas Indonesia

Bachelor of Computer Science

Jakarta, Indonesia

2017 –2021

Personal Project

Kiku

<https://github.com/minorsevenflatfive/kiku>

- Developed a MacOS application for music transcription using JUCE and C++
- Implemented audio processing features including time stretching and pitch shifting
- Still a work in progress

Languages

Indonesian (Native), **English** (Proficient - IELTS 7.5), **Japanese** (Beginner - JLPT N4 Equivalent)
